

Powerider

POWERIDER AGM RANGE

Designed for ride-on mowers, Powerider batteries with AGM Technology are constructed to deliver long lasting high performance in all Australian conditions.

Equipped with the most advanced technological features, Powerider is designed to have protection against corrosion and vibration damage. Powerider is developed to deliver maximum power and performance for your garden needs.

Key Features:

- Non-Spillable Electric Storage
- Sealed MF design for added protection against dirt, dust and grass
- Sturdy construction to resist vibration & deep discharge damage
- Supplied Charged & Ready to fit in any position
- Lower resistance, high power output and lower self-discharge
- Faster charging time compared to flooded batteries
